### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was tried twice in a telephone interview with Gregory J. Maier on 9/22/06 but he could not be reached. However, subsequently the receptionist took the material for the amendment to convey the attorney but no reply was made. The application has been amended as follows: The abstract is in two Paragraphs and amended as follows:

### **ABSTRACT**

An installation for very long term storage of products emitting a high thermal flux. The installation comprises a container (14), in which the products to be stored are placed, and an evaporator (22) surrounding the container, to evacuate the heat through a heat-pipe effect. The evaporator (22) comprises a jacket (28), pipes (32) integral with the jacket and filled with a coolant fluid such as water, and a system for tightening the evaporator (22) on the container (14). The arrangement is such that the evaporator (22) is not maintained in close contact with the container (14) except in front of the pipes (32). Advantageously, channels (42) are provided for air circulation by natural convection between the evaporator (22) and the container (14), on both sides of the pipes (32).

The improperly formed multiple dependent claims 7, 10 and 11 are amended as follows:

The numeral "3" in line 2 of claim 7 has been changed to---"2"----. Similarly numeral "9" in line 2 for claims 10 and 11 has been changed to ---"2"-----.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Claim 1 is allowable because the prior art of record fails to disclose or suggest or teach the recited tightening the evaporator on the container, characterized in that the evaporator has an internal surface such that the tightening means maintain the evaporator in close contact only in front of the pipes which are integral with the jacket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad M. Ali whose telephone number is (571) 272-4806. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
